

SURGICAL CONSENT FOR ELECTIVE SURGERY

(Spay, Neuter, Declaw & Dental for Animals **Under 6**)

Owner: _____ Pet: _____ Age: _____

I certify that I own or am an agent for the owner of the above described animal. I hereby authorize the Doctors at Sugar Creek Animal Hospital and whomever they may designate as associates or assistants to anesthetize this pet and perform the following procedures:

Spay Neuter Declaw Other
 Dental under 6 years of age

If an unforeseen condition arises calling for, in the doctor's judgment, procedures in addition to or different from those now contemplated, I further request and authorize the doctor to do whatever he deems advisable. ***I agree to pay, in full, for all medical services rendered, including those deemed necessary for medical or surgical complications or otherwise unforeseen circumstances.*** I understand that every effort will be made to notify me prior to additional treatment for non-emergency conditions.

The nature and purposes of the procedures, the risks involved and possibility of complications have been explained to me to my satisfaction. I realize that no guarantee nor warranty can ethically or professionally be made regarding the results, or cure. I understand that there is always a risk involved with anesthetic or surgical procedure and I accept these risks.

PRE-ANESTHETIC TESTING

Like you, our greatest concern is the well-being of your pet. Before anesthetizing your pet, we will perform a full physical examination. However, many conditions, including disorders of the liver, kidneys, heart or blood, are not detected unless testing is performed. Such tests are especially important before any kind of surgery.

For these reasons, we offer **BASIC PRE-ANESTHETIC** screening which includes a CBC & Mini Chem profile. **The BASIC SURGERY screening is \$83.50.**

Our lab is equipped to run these tests and the information will be available before anesthesia and/or surgery.

Please indicate your choice below:

YES, I want my pet to have the **BASIC SURGERY** pre-anesthesia testing for \$83.50.

NO, I do not want my pet to have pre-anesthesia testing.

A microchip can be implanted in your pet while under anesthesia for \$44.50.

YES, I want my pet to be microchipped while under anesthesia.

NO, I do not want my pet to be microchipped.

A canine baseline hip study can be done on your pet while under anesthesia for \$149.50.

YES, I want my pet to have the canine baseline hip study.

NO, I do not want my pet to have the canine baseline hip study.

****Your pet must be free of internal or external parasites or they will be treated at the owner's expense.****
